comprehensive exams

Nastassia Savage successfully completed comps in December, 2016.

Theses & dissertations

Dr. Rosopa’s youngest daughter, Elenah (who at the age of 3 aspired to become a dolphin when she grew up), graduated early from high school and is waiting to hear from other colleges before making a final decision. (Most colleges don’t seem to offer a dolphin major.) Dr. Rosopa’s oldest daughter (Cecilia) is serving for 10 months with the National Health Corps in Florida in a battered women’s and children’s shelter before going back to finish her degree in public health at USC. This past summer Dr. Rosopa played USTA Mixed Doubles League matches with his wife, Melodee, and Elenah. They won all of their matches together. Based on Dr. Rosopa’s match results last year, he was promoted to a higher USTA level (4.0).

Meet Your New Post-Doc:

Chelsea LeNoble

Chelsea joins the Clemson and GHS partnership upon graduating from the I/O Psychology Ph.D. program at Florida Institute of Technology in Melbourne, FL.

Broadly, her interests include occupational health psychology and workplace self-regulation. At the intersection of these domains is employee recovery from work, where she has conducted most of her research. She is interested in organizational climate factors that influence employee health and well-being as well as the internal factors that drive effective self-regulation, such as self-efficacy and personal resources. As a proponent of dynamic workstations, she happens to do a lot of her work from a treadmill desk at home!

In addition to her primary research interests, Chelsea has participated in a great deal of applied work within government and military labs, focusing on team and multiteam system training and effectiveness. Before joining Clemson, she worked on a contract with the US Navy to conduct cognitive task analyses on aviators and electronic warfare operators.

She is looking forward to building the Clemson-GHS partnership and using her skills in multilevel research methods to conduct research on topics such as hospital leadership, employee engagement and well-being, and team-level recovery. She’s excited to be part of such a strong I/O program and supportive university community.

Outside of academic life, Chelsea spends lots of time with her dog, Finn, who is a Carolina Dog breed. She also likes to watch sci-fi television shows, lift heavy weights, and make homemade ice cream!

Please join us in welcoming Chelsea!
