

Spots on leaves from crop oil injury

Signs of recent grass herbicide + crop oil spray

Late leaf spot lesions

“Hello there peanut field, how have you *bean*?”

flagging, dying plants in field

A photograph of a peanut field. The plants are mostly green, but there are several areas where the plants are brown and dead, indicating flagging. A red arrow points from a text box to these dead plants.

Whether or not beans are a magical fruit,
In rotation with peanut, they share disease and pollute

Mycelium and sclerotia from stem rot/white mold fungus

Brittle shredding taproot with red perithecia fruiting bodies from *Cylindrocladium* black rot fungus

VBC moth, characteristic line from wing tip to tip
